1. In May 1951, radar equipment closely resembling a Freya was observed installed on a small hill one mile north-northwest of Khisar Momina Banya (N4230 E2444).
2. On 2 March 1952, the equipment was still in position.
3. The array itself was not seen to rotate, and the distance from which observation was made precluded the possibility of judging the dimensions of the radar with any accuracy.
